Good evening Mr. Goertz and Ms. Schmitt,

I apologize for my late email it's a result of travel.

Thank you so much Sir for the information, I've already shared it with the Team. One of our Engineers will try to attend ACS National Meeting.

I'm also meeting with the Team this week to further discuss sampling of water and air, after our discussion I will provide you an update.

Take care.

Respectfully,

Tita

Good Morning Tita,

The University at Albany will be presenting the attached on Thursday at an "ACS National Meeting".

Also, as we discussed, I would like to see some sampling performed on the air discharge and the waste water discharge during thermal destruction of Triple A fire fighting foam at your facility. The purpose of this is to verify that total destruction of pfos is accomplished during incineration. There are so few effective ways in which to manage this waste, it would be great to show that incineration is a viable option.

Thank You

Keith

Thank you for taking the time to speak with me. I look forward to receiving any information you can share.

Sergio, Prince and myself will call you next week.

Have a good weekend.

Respectfully,

Tita
