

DEC to WaterFront: July 21, 2022

DEC required BIDCO Marine Group to submit an application for a temporary revocable permit (TRP) and issued the TRP to BIDCO Marine Group for use of the Severne Boat Launch as a temporary staging site. DEC issues TRPs in its sole discretion for the temporary use of State Lands pursuant to 6NYCRR part 59. See <https://www.dec.ny.gov/regulations/51387.html> . After review of the application by DEC staff to ensure the use is protective of public health and the environment, TRPs are issued for many requests, such as fishing tournaments. The TRP has an end date of July 22, meaning BIDCO is to remove the equipment from the Severne Fishing Access Site by tomorrow. The barge will stage the equipment away from the boat launch on the lake.

BIDCO is working with Greenidge Generating LLC to install the required wedge wire screens at its facility.
