

October 7, 2021

Seneca Lake Guardian  
PO Box 333  
Watkins Glen NY 14891 **Attention:**  
**Yvonne Taylor**

Dear Ms. Taylor:

As you know, on June 5, 2021, we sent you a 14-page letter outlining several false and misleading statements made publicly by you about Greenidge and its operation.

For months prior to sending that correspondence, we responded respectfully to your consistent disregard for the truth about Greenidge and the people who work at the facility. We shared operational data in local newspapers, answered media inquiries driven by your intentionally misleading statements, and published advertisements correcting the record at every possible turn. We respectfully requested in our June letter that you review the facts provided -- and cease making false statements.

Unfortunately, you have elected to continue the same approach.

A recent -- but far from only -- example is attached and linked here. It is the message disseminated by you and The Seneca Lake Guardian on August 31, 2021 via Facebook. As you can see, you have signed the bottom of the document. **Remarkably, the communication repeats many of the same claims we advised you were materially false via our letter of June 5, 2021.** As such, we have provided once again here the truth behind each of these false statements.

Vigorous, honest debate over environmental issues is something to be applauded. Your continuing effort, by contrast, to intentionally deceive the public by outright lying about our company's operation, its compliance with the law and the amazing people who work at our company is no longer acceptable. Should it continue, we will explore pursuit of any and all legal remedies available to our company.

Sincerely,

A handwritten signature in black ink that reads "DALE IRWIN".

Dale Irwin  
CEO  
Greenidge Generation LLC
