ENB Region 8 Completed Applications 11/01/2023

[Region 8 SEQR and Other Notices](#)

[Region 8 SPDES Renewals](#)

Steuben County

Applicant:

Momentum of WNY LLC
691 Addison Rd
Painted Post, NY 14870

Facility:

Momentum Materials Management
Industrial Park Rd N @ End of Cul De Sac
Bath, NY

Application ID:

8-4624-00207/00001

Permit(s) Applied for:

Article 27 Title 7 Solid Waste Management

Project is Located:

Bath, Steuben County

Project Description:

The applicant proposes to build a three-building materials processing and recovery facility that would accept construction and demolition debris (C&D), non-hazardous industrial waste, non-hazardous sludges, and contaminated soils, with an average daily throughput of 106 tons and maximum throughput of 2,000 tons per week. The facility will include waste storage areas, a scale house, an onsite holding tank and a leachate pre-treatment system, and a building for handling and storage of waste materials that will also have areas for office space.

All materials other than select C&D debris will be handled indoors. Materials will be separated, decanted, solidified, reduced, and/or consolidated, based on the material type, before being transported to their final destination.

Normal operational hours are proposed for 7:00 a.m. to 5:00 p.m., Monday through Saturday.

A document repository with additional information is available online at the following link:
<https://momentummaterialsmanagementfacility.com/>

Pursuant to the requirements of Sections 7(2) and 7(3) of the Climate Leadership and Community Protection Act (CLCPA), the Department has requested and received information regarding the project's consistency with the CLCPA.

The project also requires an air registration.

Availability of Application Documents:

Filed application documents, and Department draft permits where applicable, are available for inspection during normal business hours at the address of the contact person. To ensure timely service at the time of inspection, it is recommended that an appointment be made with the contact person.

State Environmental Quality Review (SEQR) Determination:

Project is an Unlisted Action and will not have a significant impact on the environment. A Negative Declaration is on file. A coordinated review was performed.

SEQR Lead Agency: Bath Town Planning Board

State Historic Preservation Act (SHPA) Determination:

A cultural resources survey has been completed. The report of the survey is on file. No archaeological sites or historic structures were identified at the project location. No further review in accordance with SHPA is required.

Coastal Management:

This project is not located in a Coastal Management area and is not subject to the Waterfront Revitalization and Coastal Resources Act.

DEC Commissioner Policy 29, Environmental Justice and Permitting (CP-29)

The proposed action is subject to CP-29. An enhanced public participation plan was submitted by the applicant and has become part of the complete application.

Opportunity for Public Comment:

Comments on this project must be submitted in writing to the Contact Person no later than *Nov 16, 2023*.

Permit(s) Applied for:

Article 24 Freshwater Wetlands
Article 15 Title 5 Stream Disturbance
Section 401 - Clean Water Act Water Quality Certification

Project is Located:

West Union, Steuben County

Project Description:

The applicant is proposing to construct approximately 360 LF of a single low pressure 2" natural gas pipeline via Horizontal Direction Drilling (HDD) bore through NYSDEC regulated Class 2 Freshwater Wetland (FWW) RX-1 and its associated 100-foot Adjacent Area (FWAA). The entry and exit pits for the HDD bore will be located outside the regulated FWW and the FWAA. Approximately 180 LF of this 360 LF section of pipeline will be drilled under the bed and banks of Marsh Creek, a class C(T) tributary to Cryder Creek. The pipeline will be drilled at least 15 feet below the bed of Marsh Creek. The total length of pipeline to be constructed is 1.3 miles; this will be a collector line for existing oil wells and will connect to an existing natural gas pipeline. The proposed pipeline will capture natural gas byproduct from the oil wells that is currently being flared. Consistent with Climate Leadership and Community Protection Act (CLCPA), an analysis was provided within the application regarding the project's consistency with the statewide greenhouse gas (GHG) emission limits.
